BACnet™ ASHRAE

DAVITOR BACnet Gateway is an elegant way to make your BACnet devices accessible outside your local network through a secure encrypted connection. No configuration or openings in your firewall are necessary. This makes bindings between BACnet object at different locations possible in a secure way. Your cell phone can remotely control or monitor your BACnet devices in a secure way through DAVITORs app.

• DAVITOR BACnet Gateway is as BACnet/IP node with Ethernet connectivity that can Communicate seamlessly with all BACnet standard application on the market.

• DAVITOR BACnet Gateway makes devices on local network remotely controllable by cell phone or tablet outside of local network without compromising security.

• DAVITOR BACnet Gateway follows BACnet standard and fully operates with Commercial Off the Shelf BACnet products.

Input: 5V $\overline{\cdots}$ 0,5A

CE | RoHS 2011/65/EU
